

## Release of Accelrys® JDraw Applet 1.1 SP2

December 2010

Dear Accelrys Draw Customer,

Many thanks for your continued use and support of Accelrys products. We are pleased to announce that **Accelrys® JDraw Applet 1.1 SP2** is now released and available for download.

**Accelrys® JDraw Applet 1.1 SP2** is a compact, thin-client, cross-browser applet which enables scientists to edit and render chemical structures, Markush structures, Markush queries, and reactions. It provides access to Accelrys best in class chemical representation and query features. As a Java applet it allows for editing of structures directly in the webpage or as part of a Java application. It supports Clipboard operations with major chemical structure drawing applications, including Accelrys Draw, ISIS/Draw, and ChemDraw. As part of the release both Java and Javascript examples are provided, as well as an API Reference (javadoc).

- **New Features in Accelrys® JDraw Applet 1.1 SP2:**

- Colored atom labels
- Atom label toolbar
- Extended support of enhanced stereochemistry (V3000)
- R-Group query tutorial

Other Key Technical Points:

- **Accelrys® JDraw Applet 1.1 SP2** is supported with the following browsers:
  - Firefox 3.6 (Windows)
  - Internet Explorer 7.0 and 8.0 (Windows)
  - Safari 3.2.1 and 4.0.3 and higher (Macintosh)
- **Accelrys® JDraw Applet 1.1 SP2** is supported with JRE 1.5.0.16 and higher or JRE 1.6.0.20 and higher

<b>Note:</b> 	<b>IMPORTANT!</b> Accelrys® JDraw Applet 1.1 SP2 might not work with JRE versions prior to those stated above. In particular the applet will not work with version 1.6.0.15 due to a defect in the Sun JRE.
---	---

For additional information, see the **Accelrys® JDraw Applet 1.1 SP2 Release Notes** and **System Requirements**.

<b>Note:</b> 	We would also like to take this opportunity to remind you about our plans to <a href="#">move support for Windows XP, Internet Explorer 6, and Office 2003 SP2 into our Legacy support status.</a>
